**FOR IMMEDIATE RELEASE**  
**June 21, 2011**

### **Wacom® Technology Corporation uses DreamWatts® Energy Management System to become more energy efficient**

VANCOUVER, WASHINGTON, USA- Makad Energy, LLC (“Makad Energy”) has announced that Wacom Technology Corporation (“Wacom”) has joined the growing list of companies using Makad Energy’s DreamWatts® Energy Management System (“EMS”) to more effectively manage the HVAC systems at their North American headquarters building in Vancouver, WA. Wacom will save energy while lowering the time and effort required to optimally manage HVAC schedules, respond to comfort complaints and to diagnose problems.

The DreamWatts® EMS provides facility managers the ability to easily set, monitor and adjust HVAC (“Heating Ventilation & Air Conditioning”) set points and schedules from a central or remote location via the Internet using a standard web browser. Email and text message alerts can be used to automatically notify designated personnel when abnormal events occur, such as the temperature in a server room exceeding specified limits. “The DreamWatts system has let me get control of HVAC usage in the Wacom Vancouver facility,” stated Kelly Ann Schroeder, at Wacom Technology Corporation. “When we were using programmable thermostats, we had no visibility into whether the desired schedules and set points were still in effect or whether the HVAC equipment was running during unoccupied hours. Now we can be sure exactly how the systems are operating and can easily make adjustments to make schedules and set points more effective.”

#### **About Makad Energy:**

Makad Energy was formed in 2009 to develop new technologies in the field of energy conservation and renewable energy, including the development and construction of renewable energy generation facilities and biorefineries as well as the potential of trading in carbon credits and other renewable energy instruments. Makad Energy is an affiliate of Makad Corp. and a member of the Makad Global Team.

#### **About Wacom:**

For over 25 years, Wacom’s vision to bring people and technology closer together through natural interface technologies has made it the world’s leading manufacturer of pen tablets, interactive pen displays and digital interface solutions. The advanced technology of Wacom’s innovative input devices has been used to create some of the most exciting digital art, films, designs, interactive classrooms and corporate boardrooms around the world. In addition, Wacom provides business and home users with the ability to explore digital content in a comfortable and intuitive way. Today, millions of customers use Wacom’s cordless, battery-free, pressure-sensitive pen technology to enhance their digital workflow.
